

1. Insulation resistance of adjacent open terminals shall not be less than 50 MegaOhms when measured with 100 Volts resistance meter.
2. Connector shall withstand 250 Volts (R.M.S.) between adjacent open terminal for one minute.
3. Contact resistance of normally closed terminals shall not exceed 0.03 Ohms when measured at a current of one Ampere by Voltage drop method.
4. After exposed at temperature of  $40 \pm 2^{\circ}\text{C}$  and at relative humidity of 50 to 95% for 48 hours and dried at room temperature for 30 minutes, insulation resistance shall not be less than 30 MegaOhms.
5. Connector shall withstand 5,000 cycles of insertions and withdrawal with testing plug. Contact resistance shall not exceed 0.1 Ohm

- ☐ A (HOUSING): NYLON 6T.  
☐ B :COPPER ALLOY.  
☐ C :COPPER ALLOY  
☐ D :BRASS.
